

Charles Hack Sain

The Board of Trustees
of

Dyson Leadership Institute

Honor you and lift you up as an example for others
by naming one of our most important opportunities for service:

The Hack Sain Leadership in Engineering Program

We honor you because of your commitment to leadership development for your profession. We honor your example of leadership to cast a vision and persevere through obstacles and the doubts of others until the mission is accomplished. You recognized the need for leadership development to help ordinary people provide extraordinary service and results. Like a pioneer, you started the journey when most people preferred the comfort of status quo. And, you persevered long enough to prove your vision correct through results. Your leadership and service has helped us fulfill our mission:

To help people, their families and organizations
to PLAN and LEAD in LIFE
to fulfill their callings.

We pledge to serve to continue this legacy
and hope we continue to earn your trust and support.

We appreciate your past service as trustee chairman and your continued service.

David Dyson
